# The Meeting Place

## Greet – Meet – Connect

## Tips for using TMP to meet new friends

### Simply click sign up on the home page

### Choose your membership sign up option

**The different sign up options are so that you can choose who to connect with.**

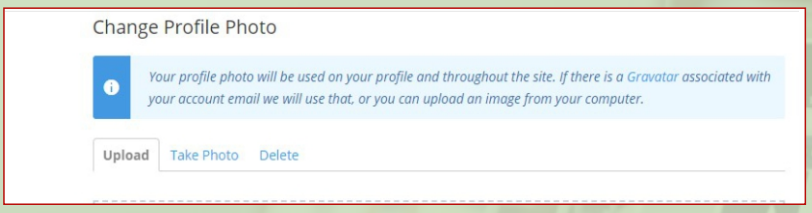

### Complete your profile

**Select at least 3 interests you have as well as your favourite teams or people/personalities. The more information you provide will ensure you can find friends with similar interests to you.**

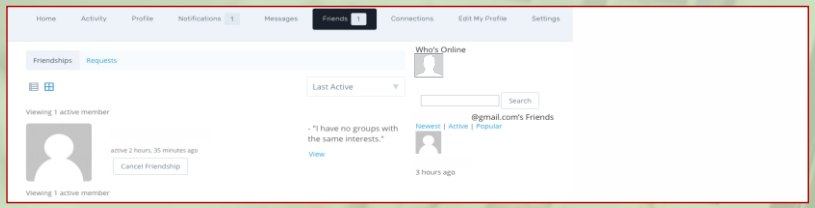

### Upload your profile photo and cover image

**Upload a recent photo based on the membership option you choose. The cover image is what will be displayed in the background, could be something of interest to you, your favourite holiday destination anything you choose. You can always change your photo or image by logging in, going to your profile and selecting change profile photo or change cover image.**

### Take the lead

**Find friends by going to your profile and seeing who has similar interests to you. You can then look at their profile and decide whether to send a friend request or not. You should send lots of friend requests and introduce yourself to numerous potential new friends. You can always go to your profile under friends and cancel friendships if you choose to do so. It is better to take the lead than waiting for someone to send you a friend request. This way will let you make new friends quickly. You won't always find the friend you are looking for immediately, but don't worry, your perfect friend is out there.**

### Take your time

**The friend you are looking for may not be signed up yet, so take your time and keep checking your similar interests to see if the friend you are looking for has signed up.**
